Media highlights:

Dr John Morares was interviewed by Kristen Rogers for an article in CNN. CNN has an estimated readership of **123 million/month**.

The research was discussed on the BBC World Service Health Check radio show that can be listened to [here](#) and has approximately **73.3 million listeners/month**.

The research was also featured in articles in leading UK newspapers The Independent and The Daily Mail, and the US newspaper New York Post. These have a combined estimated readership of **166 million/month**.

Total number of unique readers per month of the media outlets that picked up the article:

1,698,964,000

Altmetric score:

In the top **0.03 %** of all research outputs (approximately 27 million) scored by Altmetric. ([For more details...](#))

The Altmetric Attention Score for a research output provides an indicator of the amount of attention that it has received. The score is derived from an automated algorithm, and represents a weighted count of the amount of attention we've picked up for a research output.

#1 of 3138 research study outputs from the journal

#70 of 215,672 research study outputs of similar age

Number of views of original paper:

3673

Number of non-Chinese language media articles that mentioned the study:

486

Languages the article has been translated into (not including Chinese):

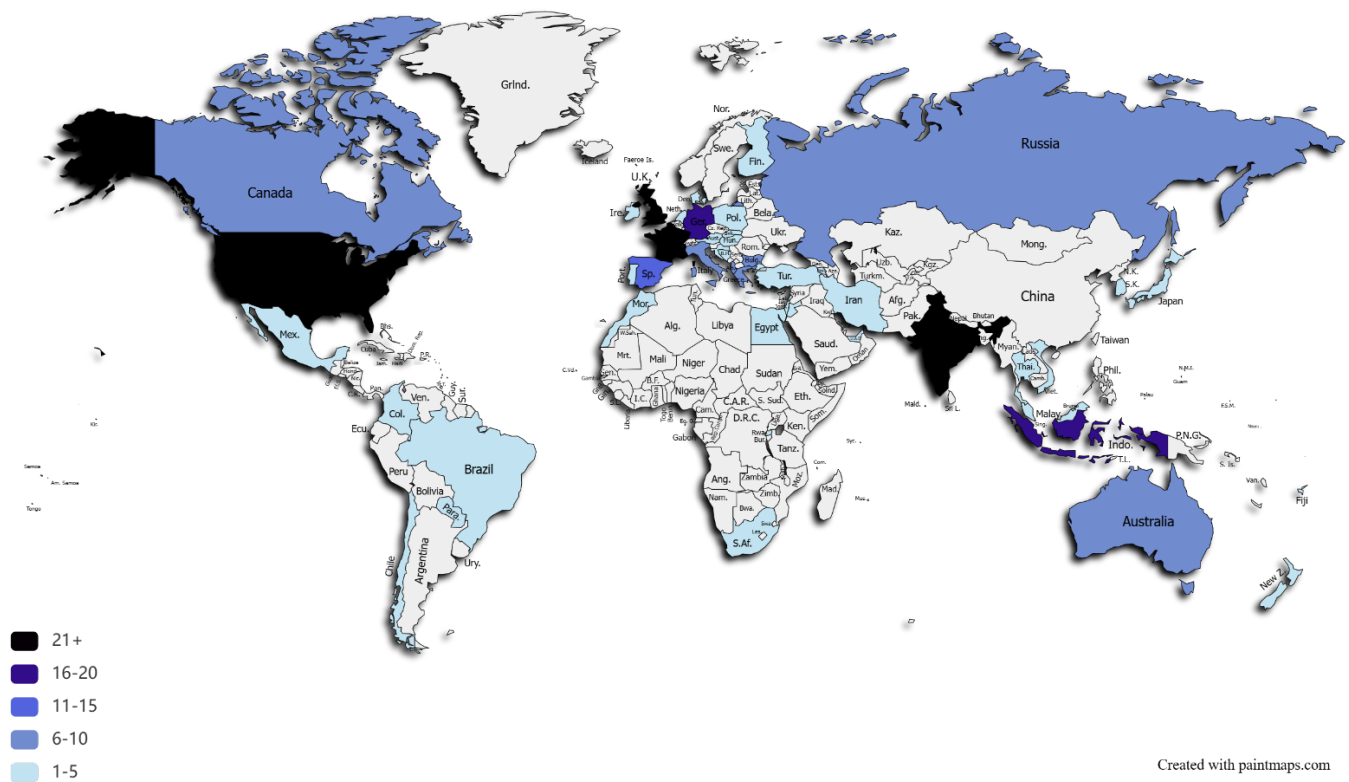

Albanian, Arabic, Armenian, Bosnian, Bulgarian, Catalan, Croatian, Danish, Finnish, French, German, Greek, Hebrew, Hindi, Hungarian, Indonesian, Italian, Kinyarwanda, Korean, Malay, Marathi, Modern Greek, Persian, Polish, Portuguese, Russian, Slovak, Spanish, Vietnamese

Advertising value equivalency* (USD):

\$13,349,467

*Advertising value equivalency (AVE) is used to measure the dollar value of media coverage. AVE measures the size of the media coverage, the space it was put, and calculates the advertising rate for a similar ad.

Number of non-Chinese language articles that mentioned the study by country:

Thanks for your support and we look forward to working with you again!
