30-DAY MEDIA REPORT – RESEARCH ARTICLE

Original paper: Aggregation Rules of Short Peptides

Journal: JACS Au

Authors: Jiaqi Wang, Zihan Liu, Shuang Zhao, Yu Zhang, Tengyan Xu, Stan Z. Li, Wenbin Li

Date published: 3 September 2024

URL: <https://pubs.acs.org/doi/10.1021/jacsau.4c00501>

Title of press release: Exploring peptide clumping for improved drug and material solutions

Date Published: 3 September 2024

URL: <https://www.xjtlu.edu.cn/en/news/2024/09/exploring-peptide-clumping>

Total number of unique readers per month of the media outlets that picked up the article:

10,670,648

Altmetric score:

In the top 2.5% of all research outputs (approximately 27 million) scored by Altmetric. ([For more details...](#))

The Altmetric Attention Score for a research output provides an indicator of the amount of attention that it has received. The score is derived from an automated algorithm, and represents a weighted count of the amount of attention we've picked up for a research output.

Number of non-Chinese language media outlets that picked up the media release:

22

Languages the article has been translated into (not including Chinese):

Persian, Spanish

Advertising value equivalency* (USD):

\$73,257.39

*Advertising value equivalency (AVE) is used to measure the dollar value of media coverage. AVE measures the size of the media coverage, the space it was put, and calculates the advertising rate for a similar ad.

Number of non-Chinese language media outlets that picked up the media release by country:

Thanks for your support and we look forward to working with you again!
