30-DAY MEDIA REPORT – RESEARCH ARTICLE

Original paper: Do greenspaces really reduce heat health impacts? Evidence for different vegetation types and distance-based greenspace exposure

Journal: Environment International

Authors: Jinglu Song, Antonio Gasparrini, Di Wei, Yi Lu, Kejia Hu, Thomas B Fischer, Mark Nieuwenhuijsen

Date published: 26 August 2024

URL: <https://doi.org/10.1016/j.envint.2024.108950>

Title of press release: Urban forests reduce heat-related mortality, study shows

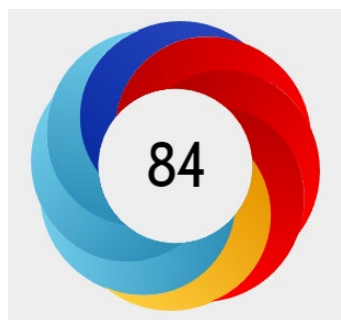

Date Published: 12 September 2024

URL: <https://www.xjtlu.edu.cn/en/news/2024/09/urban-forests-reduce-heat-related-mortality-study-shows>

Total number of unique readers per month of the media outlets that picked up the article:

162,573,795

Altmetric score:

In the top 2% of all research outputs (approximately 27 million) scored by Altmetric. ([For more details...](#))

The Altmetric Attention Score for a research output provides an indicator of the amount of attention that it has received. The score is derived from an automated algorithm, and represents a weighted count of the amount of attention we've picked up for a research output.

Number of non-Chinese language media outlets that picked up the media release:

31

Languages the article has been translated into (not including Chinese):

Arabic, French, German, Indonesian, Greek, Persian, Portuguese

Advertising value equivalency* (USD):

\$1,479,011.87

*Advertising value equivalency (AVE) is used to measure the dollar value of media coverage. AVE measures the size of the media coverage, the space it was put, and calculates the advertising rate for a similar ad.

Number of non-Chinese language media outlets that picked up the media release by country:

Other impact:

Dr Song was invited to give expert comment for a feature article in New Scientist Magazine, UK. New Scientist has a monthly readership of 4.3 million people.

Dr Song was also asked for an interview by a student on the Masters of Journalism programme at Carleton University in Ottawa, Canada.
